SUMMARY

Duplo's PFi BIND 2100 is the world's simplest and most advanced PUR binder. It is designed to democratise and deskill the PUR binding process. The 2100 is ridiculously simple to use, maintain and clean. The 2100 takes automation to a new level, each book is automatically measured and the amount of glue on each book block is intelligently applied on the fly. That purely means every book that you bind on the 2100 is of a high quality and is saleable. The Patented Orbital PUR System makes the cleaning and maintenance process almost redundant which results in huge savings of expensive PUR glue, wax and manhours.

IDEAL FOR

- Photo Albums
- Year Books
- Magazines
- Directories
- Instruction Manuals
- Catalogues
- Brochures

FEATURES & BENEFITS

- Fully automatic set-up – It is as simple as ABC!
- Control Centre – Make it your own. Fully customisable
- EasyLOAD Cartridge – Makes PUR handling easier than EVA!
- 5 minutes cleaning – Thanks to Patented orbital PUR system. Easy peasy!
- Auto mode – Boost productivity with buttonless operations
- Remote engineering
